

Peter Do

FULL STACK SOFTWARE ENGINEER

An environmental engineer turned software engineer with strong adaptable skills. Expertise in Typescript, React, NodeJS, and other web frameworks. Passionate about clean UI/UX design and exceptionally detail-oriented. I am dependable, reliable, and ready to learn and grow with your company.

WORK EXPERIENCE

Singularity Softworks, Canada — Full Stack Developer Intern

March 2025 - Present

- Assist in developing Singularity Softworks' web applications using Typescript, React, NextJS, Neon, and Stripe.
- Collaborate with team members to design and implement user-friendly interfaces.
- Participate in regular code reviews and contribute to weekly team discussions.
- Conduct code troubleshooting and debugging to ensure optimal performance.

Empowered Futures, Canada — Frontend Developer Intern

September 2024 - March 2025

- Develop and maintain Empowered Futures' front-end applications, using Typescript, NextJS, React, and Postgres.
- Collaborate with team members by conducting thorough code reviews, ensuring adherence to high-quality standards and best practices.
- Actively participated in weekly team meetings and monthly general meetings, contributing to project discussions, progress tracking, and ensuring alignment with organizational goals.

PROJECTS

NogiHub — Social Media Web Application

Developed a full-stack social media platform using TypeScript, React, MongoDB, Express, and NodeJS, facilitating user registration, post creation, and social interaction. Optimized the application for performance by implementing indexing and pagination to increase response times by 25%.

NogiChat — Real-time Chat Messaging Application

Engineered a real-time chat application using TypeScript, React, MongoDB, Express, and WebSockets, enabling seamless real-time communication for users. Integrated customizable UI themes and profiles to enhance user engagement and interaction.
