WORK EXPERIENCE

GHD Limited, Mississauga, ON — *Environmental Engineer*

August 2021 - April 2023

Main duties included conducting environmental impact assessments, ensuring regulatory compliance, and developing environmental management and pollution control strategies. Responsibilities included designing systems for water, air, or soil quality control, collaborating with multidisciplinary teams on sustainable solutions, and preparing detailed reports for stakeholders.

PROJECTS

Momentum Advertising & Design — *Local Business Landing Page*

An elegant landing page built with Typescript, NextJS, Tailwind, PostgreSQL, and Prisma. Assisted a local business with setting up their website. Currently, the website is a simple landing page with plans to scale up to a web portal for future clients.

NogiHub — *Social Media Web Application*

A full stack social media web application built with Typescript, React, MongoDB, Express, and NodeJS. A lightweight X (formerly Twitter) clone that allows users to sign up, create posts, follow other users, comment and like other posts.

NogiChat — *Real-time Chat Messaging Application*

A full stack chat application built with Typescript, React, MongoDB, Express, NodeJS, and web sockets to allow real time communication. Users can send and receive real-time messages from other users. The application also allows users to customize their UI theme and profile.

SKILLS

Languages: HTML, CSS, Javascript, Typescript, SQL

Technologies: React, NextJS, NodeJS, Express, Prisma, MongoDB, PostgreSQL, TailwindCSS
